Ribbigs väg 5A Sollentuna 192 52 Stockholm

SUMMARY

Results-driven Fullstack Developer with a strong focus on backend development and Azure cloud services. Passionate about designing and developing scalable applications using .NET, Azure, and SQL databases. Experienced in building and integrating REST APIs, cloud-based applications, and authentication systems. Adept at solving complex problems, working in Agile environments, and continuously improving development processes. Seeking an opportunity to contribute and grow within a dynamic team. Possesses a strong understanding and hands-on experience working with .NET and Azure.

PROJECTS & TECHNICAL EXPERIENCE

Cloud-Based Task Management System (Azure & .NET Core)

- Designed and developed a multi-tenant task management system using Azure Functions and .NET Core.
- Implemented Azure API Management for secure API gateways and rate limiting.
- Used Azure SQL as the primary database and implemented role-based access control (RBAC).

REST API Development (.NET & SQL Server)

- Designed and built a REST API with .NET Core and Entity Framework.
- Implemented CRUD operations with SQL Server and optimized database queries.
- Integrated JWT authentication for secure user access.

E-Commerce Web App (Node.js & React)

- Built a webshop application with Node.js backend and React frontend.
- Implemented MongoDB for data storage and JWT-based authentication.
- Developed a cart and order management system with secure API communication

SKILLS

Agile	Asp	.NET	Asp.net
ASP.NET Core	Bootstrap	Css3	
Entity Framework	Github	Html	
Javascript	Jwt	MongoDB	
Node	Node.js	Oop	Redux
Rest Api	Scrum	Sql	Unit Test
Visual Studio	Visual studio code
